

# energycanvas

Why and how we do something is central to our values and the services we offer. We are looking to grow our team with people who want to be part of a growing and dynamic entrepreneurial business focused on the carbon-neutral, renewable energy future.

## **Position Title:**

Installation Technician (Full-Time)

## **Location:**

Calgary, Alberta

## **About Energy Canvas:**

We are a renewable energy company focused on reliable renewable energy and integration systems. We specialize in renewable energy generation, energy storage and microgrid systems for remote and edge of grid consumers with a particular focus on diesel displacement. Our asset development activities and technology focuses on creating value throughout the asset's life from inception to operation.

## **Job Description:**

- Liaise with the Vancouver team for coordination of projects.
- Lead and execute met tower installations with a special focus on the installation and practical project requirements for the safe installation of lattice towers up to 150m tall.
- Lead and execute met tower/MET campaign de-installations/decommissioning activities.
- Perform maintenance work, troubleshoot technical problems associated with wind measurement systems and complete service reports accordingly.
- Support site preparation and equipment procurement activities.
- Manage and oversee external contractors during field installations of measurement masts, including quality control and commissioning.
- Training will be provided.

## **Requirements for this position:**

- Willingness to travel within Canada to support projects with field services.
- Willingness to travel abroad for training and occasional project support.
- Competence and/or willingness to work at height.
- Experience with operating excavators and/or tracked equipment.
- Class 5 Driver's License and familiarity with trailers.
- Problem-solving and troubleshooting skills.
- Excellent written and oral communication skills.
- Be legally able to work in Canada.

This role mainly supports projects in Alberta and other parts of the Canadian Prairie provinces. Therefore, the ideal candidate would be from the Prairies with a preference for the Calgary region with the flexibility to work from home. This leadership position can lead to a wide array of project experiences and professional growth opportunities.
